

# Le Huynh Anh Tuyet

Date of birth: Oct 14, 2000

Gender: Female

**Phone:** 0817493884

Email: tgdd.ld9941@gmail.com

Address: Ho Chi Minh, Viet Nam

# **OBJECTIVE**

I want to gain more practical experience in software development by participating in projects. I also aim to enhance my professional skills by learning from my colleagues to become a competent employee. Additionally, I am working towards obtaining relevant certifications to solidify my knowledge and strive to become an expert in my chosen field.

#### **EDUCATION**

### **UNIVERSITY OF INFORMATION TECHNOLOGY HCMC (UIT)**

Field of Study: Information Technology Very Good Degree

# **WORK EXPERIENCE**

03/2020 - 09/2021

# Smart Attendance and Time Tracking System in the Classroom Based on Facial Recognition and Actions

Project name: The attendance system for high school classrooms

- Description: Participated in developing a facial recognition attendance web application applied for high schools, with guidance achieving a high result of 98% out of a total of 65 people (AI).
- Role: Developer.
- Responsibilities:
  - + Writing applications with the team using Node.Js, Angular and

#### Flask

- + Interface Design
- + Using machine learning to process facial recognition data and real-time actions
- + Optimize overall system performance and ensure accuracy and quick responsiveness
- + Research and using RESTful API
- Model: MVC
- Using method Deep Learning
- Programming Language: Python, Javascript
- Tool: Visual Studio Code, Anaconda

12/2020 - 06/2021

#### Data design Vietnam Company | Software Development Intern

Project name: Blockchain Wallet System

- Description: Develop and deploy the backend system for the blockchain wallet in the game
- Role: Backend.
- Responsibilities:
- + Research and integrate Firebase as a real-time database solution for specific features, such as transaction notifications and player asset tracking

- + Utilize LINQ with Entity Framework to interact with SQL Server and efficiently manage complex queries.
- + Apply the Unit of Work pattern to manage data transactions, ensuring integrity and consistency when interacting with the SQL Server database.
- + Generate dynamic reports and export data using EPPlus, providing detailed insights into transactions and the status of digital assets within the game.
- Blockchain Integration: Ethereum, USDT, NFTs, Smart Contracts
- Model: Unit of Work
- Programming Language: C#, .Net, Microservices.
- Cloud Services: Firebase Realtime Database, Firebase Authentication, Cloud Firestore.
- Tool: SQL Server, Visual Studio Code, Postman

#### 12/2020 - 06/2021

# Data design Vietnam Company | Software Development Intern

Project name: YOLO Online Shopping System

- Description: Build the user interface for the online shopping system
- Role: Frontend.
- Responsibilities:
  - + Design and implement frontend features.
  - + Build a user interface with responsive design, ensuring a smooth experience across all devices.
  - + Integrate backend APIs to display product data and process orders.
- + Optimize performance and page loading speed.
- Model: MVC
- Programming Language: Javascript. Tool: Visual Studio Code, Postman

### 12/2020 - 06/2021

#### **Data design Vietnam Company | Software Development Intern**

Project name: Cybersecurity Website

- Description: It features educational content on best practices for staying safe online, including guides on password management, phishing detection, and secure browsing. The website also includes interactive tools such as a password strength checker and a threat detection service that helps users identify and mitigate potential security risks.
- Role: Developer.
- Responsibilities:
  - + Website Development and Interface Design
- Model: MVC
- Programming Language: C#, ASP.NET
- Tool: SQL Server, Visual Studio Code, Postman

## 09/2022 - 11/2022

#### **Testing Viet Nam Company | Intern**

Project name: Website BMA Calculator

- Role: Automation Tester
- Responsibilities:
- + Develop and maintain automated testing scripts using Selenium.
- + Create automated test cases
- + Integrate testing scripts into the CI/CD pipeline for automated execution.

- + Analyze test results and report bugs.
- Performance Testing: Jmeter.
- Use the Scrum-Agile process
- Tool: Jira

05/2022 - 09/2022

# **Testing Viet Nam Company | Intern**

Project name: Hogodoc, OrangeHRM

- Role: Manual Tester
- Responsibilities:
- + Read and analyze documents
- + Q&A, Execute the application to find bugs, write test cases
- + Report bugs on Jira
- Performance Testing: Jmeter.
- Use the Scrum-Agile process
- Tool: Jira

# **CERTIFICATIONS**

09/2022 - 11/2022	Automation Testing certification from Testing Vietnam Company
10/2022	Confluence Fundamentals certification from Atlassian  https://university.atlassian.com/student/award/UmUta7LYyTCGNCXj4dPq4YS1
09/2022	Jira Fundamentals certification from Atlassian  https://university.atlassian.com/student/award/stftaeiVLkVmdbtRJngHCSwB
05/2022 - 07/2022	Fresher Tester certification from Testing Vietnam Company

# **SKILLS**

Language & Scripting	Python, Java, C#
Tool	Visual Studio Code, Postman, Jira, MS SQL Server, SVN, Eclipse
Framework	Flask, Angular, Node.js, ASP.NET
Testing	Testing process, level test, test type, selenium, Jmeter
